OVERVIEW

Of the many challenges facing today's project leaders, managing organizational change is often the most difficult. Implementing successful change involves a complex process that balances strategic and technical requirements against the "soft stuff" of human behaviour.

This workshop takes a practical look at organizational change management in a project setting, providing a survival guide for managing the integration of change into your business. Rich in "real-world" experience, it will equip then project management team with concepts, tools and techniques for planning, managing and achieving sustainment of the changes needed to drive project benefits into your business to meet organizational strategic goals.

AUDIENCE

This workshop is intended for Project and Operational Managers and those who are currently or about to be involved in projects causing change internal and/or external to the organization. It is also for Senior Managers and Executives who wish to grow their knowledge of change management and integration concepts, in order to manage stakeholders and implement necessary change in the organization.
